2012 USGBC-Inland Empire Chapter Board of Directors Candidates

Casey Dailey
Assistant to the Mayor
City of San Bernardino

Membership Category: State and Local Government

Why do you wish to be a member of the Chapter's Board of Directors?

I am very supportive of the USGBC-IE, its goals, objectives and mission. My first year as a Board member has introduced me to the wide world of advocacy, green schools, municipalities and sustainable communities, as well as the multitude of industries that are interested/affected by USGBC. I wish to remain on the Board to continue work related to the above referenced topics as well as to continue to expand the reach and scope of our Chapter. Additionally, I believe my background and professional work supports the existing mission and objectives of the Chapter.

Please provide a summary of your relevant experience, expertise relationships and resources that you can bring that will benefit the Chapter.

I currently serve as Assistant to the Mayor in the City of San Bernardino, responsible for executive level policy advice in the areas of transportation, land use and environmental sustainability issues. Additionally, I serve as the City's legislative and intergovernmental affairs liaison. As such, my ability to reach into the world of local and state government should be an attractive attribute to the Chapter. In my first year as a Board member, I was able to bring a \$14,000 contract to the Chapter for training services to various staff members of the City of San Bernardino, as well as bring new sponsors that previously have not donated/contributed to the Chapter

Please describe your experience serving other volunteer / non-profit /trade organizations and identify any leadership positions held.

I currently serve on the Board for the USGBC-IE Chapter, and have previously served on the Board of the San Bernardino Symphony, as well as the City of San Bernardino Planning Commission.

Identify the areas that you would like to see the chapter grow and better accomplish its vision and how you could assist in that effort.

I think the most important function for the Chapter to serve is to be a valuable resource to its membership. This is accomplished by being a depository of information, education and advocacy. The Chapter must also serve as a congregation for its members to network and learn about the various elements involved in green building and design. personally, I would like to see membership grow in the area of government; the more members in local government that 'drink the kool-aid' the more opportunities this region has to grow in the green sector economy.
